## 1 No Brainer Markdown to HTML & PDF

For each markdown files it will generate:

- an HTML Document: [example](#)
- an HTML Presentation (using reveal.js): [example](#)
- a PDF Document (using XeLaTeX): [example](#)
- a PDF Presentation (using Beamer): [example](#)

```
./compile.sh
```

If you want to be the 1337, install [stack](#) and

```
./build.sh
./compile
```

### 1.1 Dependencies

- [pandoc](#) – Tested with pandoc 1.15.0.6 & 1.17.2
- [XeLaTeX](#) – Tested with XeTeX 3.14159265-2.6-0.99992 (TeX Live 2015)
- [metropolis](#) Beamer theme (working forked version here: <https://github.com/yogsototh/mtheme>)
